Changes in Project Officials must be submitted in writing from the CEO.

^{*} Failure to meet project schedule may result in termination of agreement for approved projects. Modification of dates must be requested in writing by the CEO of record and approved by the commission once the Project Agreement has been executed. The project schedule should be planned around receiving a Project Agreement on or about July 1st.

6.0 ATTACHMENTS/COMPLETENESS REVIEW:

Confirm in the blocks [] below that each item listed is attached.

- [X] A certified copy of the legislation by the governing body of the applicant authorizing a designated official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below.
- [X] A certification signed by the applicant's chief financial officer stating all local share funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter.
- [X] A registered professional engineer's detailed cost estimate and useful life statement, as required in 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's original seal or stamp and signature.
- [NA] A cooperation agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.
- [NA] Projects which include new and expansion components <u>and</u> potentially affect productive farmland should include a statement evaluating the potential impact. If there is a potential impact, the Governor's Executive Order 98-VII and the OPWC Farmland Preservation Review Advisory apply.
- [] Capital Improvements Report: (Required by O.R.C. Chapter 164.06 on standard form)
- [X] Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your *local* District Public Works Integrating Committee.

7.0 APPLICANT CERTIFICATION:

The undersigned certifies that: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement on this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding of the project.

Joe Geers, Service Director Certifying Representative

STATUS OF FUNDS CERTIFICATION

The City of Norwood has funds available in the General Fund in the amount of \$330,000.00 which can be used for participation in the Beech Street Improvements Projects.

Jim Stith, Auditor City of Norwood

Resolution No. ______

DURIN LIMITARY CHAIR BY COOKING
control this is a true and correct copy of
produttion No. 1-01001
This resolution passed by the Council of
the City of Norwood, Ohio in a
session held, 7-23-57
Clark of Lounc
THUK DI DALIKA
20/12/1
/

RESOLUTION DECLARING COUNCIL'S INTENT TO ALLOCATE THE PROCEEDS OF AN EIGHT (8) MILL RENEWAL LEVY, IF PASSED BY THE VOTERS OF THE CITY OF NORWOOD, FOR CERTAIN SPECIFIC PURPOSES.

Passed 11/07

WHEREAS, Council for the City of Norwood anticipates levying a renewal of an eight (8) mill tax in excess of the ten-mill limitation; and

WHEREAS, Council wishes to demonstrate to the voters of the City of Norwood how such revenue will be spent, should the voters pass the renewal of said levy; now therefore

BE IT RESOLVED by the Council of the City of Norwood, State of Ohio:

SECTION 1. That this Council hereby expresses its intent and desire to allocate the proceeds of an eight (8) mill tax levy renewal in the manner described in the attached Exhibit A.

PASSED 7-23-07 Date Jane M. Grote President of Council

ATTEST:

J. Brian Mumper, the duly appointed Clerk of Council, attests that this resolution was passed at a regular special meeting of Norwood City Council on the day of 2007, in compliance with the rules of Norwood City Council and the laws of the State of Ohio. The foregoing resolution was submitted to the Mayor of the City of Norwood, Ohio for his signature on the day of day of 2007.

J. Brian Mumper Clerk of Council

APPROVED 7/24/07

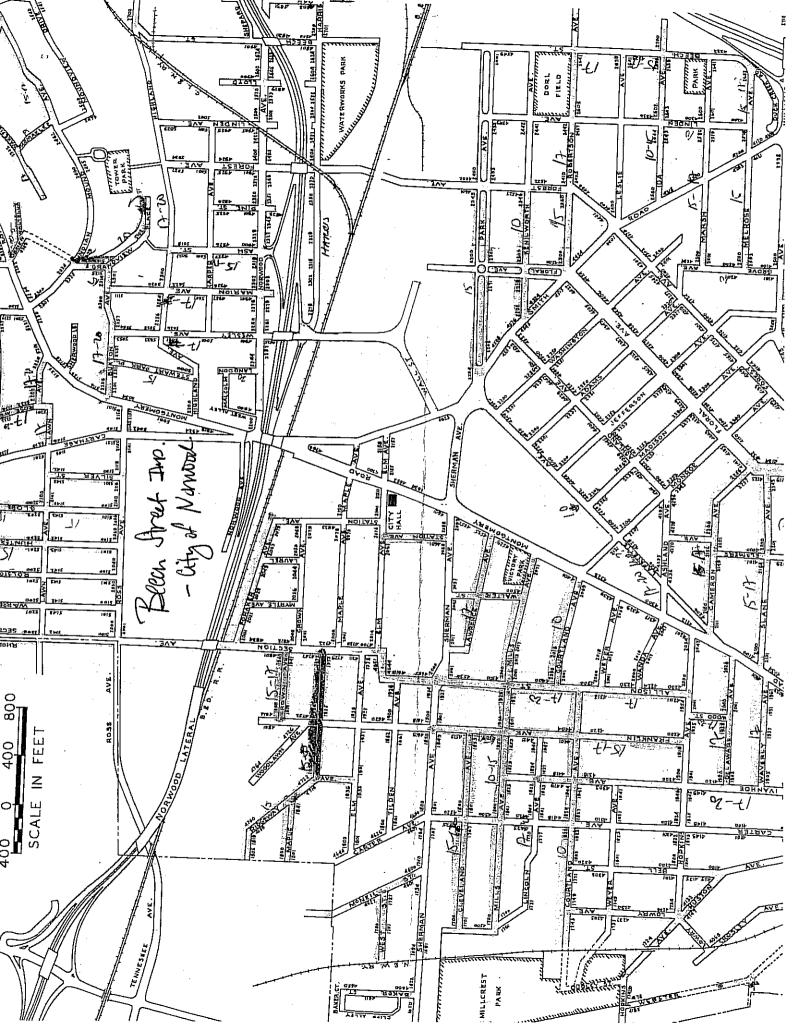

(Thomas F. Williams

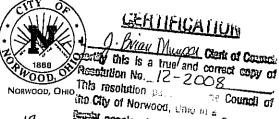

Mayor

"Exhibit A"

Contingent upon the renewal of the 8 Will Tax Levy and it generating enough funds, it is the City's intention that the following amounts be earmarked for specific purposes to ensure that the citizens of Norwood receive the specific benefits as outlined below:

\$400,000.00 is to be earmarked for Streets \$200,000.00 is to be earmarked for Capital Improvements \$100,000.00 is to be earmarked for Reserve

Resolution No. _/\

session held 0 0809-09-08

A RESOLUTION AUTHORIZING THE MAYOR OR SAFETY-SERVICE DIRECTOR TO MAKE APPLICATION FOR FISCAL YEAR 2009 STATE CAPITAL IMPROVEMENT PROGRAM FUNDS AND IF FUNDS ARE AWARDED TO EXECUTE GRANT AGREEMENTS ON BEHALF OF THE CITY.

WHEREAS, the Council of the City of Norwood has determined that it would be in the best interest and to promote the general welfare of the community to apply for 2009 State Capital Improvement Program Funds and if funds are awarded to execute a grant agreement or agreements on behalf of the City; now therefore,

Be it resolved by the Council of the City of Norwood, State of Ohio,

SECTION 1. That the Mayor or Safety-Service Director is hereby authorized to make application(s) for State Capital Improvement Program (SCIP) funds for the fiscal year 2009.

SECTION 2. That if funds are awarded, the Mayor or Safety-Service Director is hereby authorized to execute a grant agreement or agreements on behalf of the City.

SECTION 3. This resolution is hereby declared to be an emergency resolution and a measure necessary for the immediate preservation of the public peace, health, safety and general welfare and shall go into effect forthwith.

PASSED 9-9-08

Date

Jane M. Grote President of Council

ATTEST:

J. Brian Mumper, the duly appointed Clerk of Council, attests that this resolution was passed at a regular/special meeting of Norwood City Council on the O7th day of September 2008 in compliance with the rules of Norwood City Council and the laws of the State of Ohio. The foregoing resolution was submitted to the Mayor of the City of Norwood, Ohio for his signature on the 10th day of September 2008.

ADDITIONAL SUPPORT INFORMATION

For Program Year 2009 (July 1, 2009 through June 30, 2010), jurisdictions shall provide the following support information to help determine which projects will be funded. Information on this form must be accurate, and where called for, based on sound engineering principles. Documentation to substantiate the individual items, as noted, is required. The applicant should also use the rating system and its' addendum as a guide. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

IF YOU ARE APPLYING FOR A GRANT, WILL YOU BE WILLING TO ACCEPT A LOAN IF ASKED BY THE DISTRICT? _X__YES ____NO (ANSWER REQUIRED)

Note: Answering "Yes" will not increase your score and answering "NO" will not decrease your score.

1) What is the physical condition of the existing infrastructure that is to be replaced or repaired?

Give a statement of the nature of the deficient conditions of the present facility exclusive of capacity, serviceability, health and/or safety issues. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded. Use documentation (if possible) to support your statement. Documentation may include (but is not limited to): ODOT BR86 reports, pavement management condition reports, televised underground system reports, age inventory reports, maintenance records, etc., and will only be considered if included in the original application. Examples of deficiencies include: structural condition; substandard design elements such as widths, grades, curves, sight distances, drainage structures, etc.

The pavement is deteriorating, exhibited by severe alligator cracking over the majority of the roadway. In addition to visible potholes, asphalt patching is evidence of additional base failures throughout the project. Ponding of surface water along the gutter line is evidence of insufficient (substandard) longitudinal grades. This deficiency is compounded by the lack of sufficient curb reveal along the west gutter line. To correct this deficiency the longitudinal street grades will need to be increased to develop positive flow in the gutters. This will be accomplished by lowering the street elevations as required over significant portions of the project. This is necessary to ensure positive drainage, however will create a conflict (i.e. inadequate cover requirement) with the existing water line. The water line will need to be replaced with the project due to the insufficient cover conflict.

2) How important is the project to the safety of the Public and the citizens of the District and/or service area?

Give a statement of the projects effect on the safety of the service area. The design of the project is intended to reduce existing accident rate, promote safer conditions, and reduce the danger of risk, liability or injury. (Typical examples may include the effects of the completed project on accident rates, emergency response time, fire protection, and highway capacity.) Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

In conjunction with and necessitated by the roadway improvements on Beech Street, (lowering the street), the existing 4-inch watermain along Beech Street will be replaced with an 8-inch main. This will increase the capacity of the water system allowing better service and fire protection capabilities. Fire hydrants will also be replaced with the project. Beech Street is utilized by the various businesses along Beech and in other areas of the City, as well as Norwood residents. The rough and cracking surface increased the potential for accidents and injuries to motorists. The new pavement will alleviate those conditions, providing a smooth

thriving surface and a safer facility. Currently, surface runoit poiles on the street, causing icing in the winter.
The storm sewer will be upgraded to current standards (including adding catch basins), curbs will be
installed and the street will be constructed with sufficient grade to eliminate ponding of water (ref. pictures)
and the potential for freezing.
3) How important is the project to the health of the Public and the citizens of the District and/or service area?
Give a statement of the projects effect on the health of the service area. The design of the project will improve the overall condition of the facility so as to reduce or eliminate potential for disease, or correct concerns regarding the environmental health of the area. (Typical examples may include the effects of the completed project by improving or adding storm drainage or sanitary facilities, etc.). Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.
4) Does the project help meet the infrastructure repair and replacement needs of the applying jurisdiction?
The applying agency must submit a listing in priority order of the projects for which it is applying. Points will be awarded on the basis of most to least importance.
Priority 1 Park Avenue Improvements
Priority 2 Beech Street Improvements
Priority 3 Smith Road Waterline Replacement
Priority 4
Priority 5
5) To what extent will the user fee funded agency be participating in the funding of the project?
(example: rates for water or sewer, frontage assessments, etc.)
No participation – Zero (0)%
6) Economic Growth – How will the completed project enhance economic growth
Give a statement of the projects effect on economic growth No significant impact on economic growth
7) Matching Funds - LOCAL

The information regarding local matching funds is to be filed by the applicant in Section 1.2 (b) of the Ohio Public Works Association's "Application For Financial Assistance" form.

The information regarding local matching funds is to be file Works Association's "Application For Financial Assistance" for MRF application must have been filed by Friday, August 29, 2 Office. List below all "other" funding the source(s).	orm. If MRF 2008 for this _l	funds are be project with t	ing used t the Hamil	for matching

Permanent ____

For any parcels not yet acquired, explain the status of the ROW acquisition process for this project.
e.) Give an estimate of time needed to complete any item above not yet completedMonths.
11) Does the infrastructure have regional impact?
Give a brief statement concerning the regional significance of the infrastructure to be replaced, repaired, or expanded. The project will primarily affect the businesses and the residents of the City of Norwood.
12) What is the overall economic health of the jurisdiction?
The District 2 Integrating Committee predetermines the jurisdiction's economic health. The economic health of jurisdiction may periodically be adjusted when census and other budgetary data are updated.
13) Has any formal action by a federal, state, or local government agency resulted in a partial or complete ba of the usage or expansion of the usage for the involved infrastructure?
Describe what formal action has been taken which resulted in a ban of the use of or expansion of use for the involve infrastructure? Typical examples include weight limits, truck restrictions, and moratoriums or limitations o issuance of building permits, etc. The ban must have been caused by a structural or operational problem to be considered valid. Submission of a copy of the approved legislation would be helpful. No ban
Will the ban be removed after the project is completed? YesNoN/A _X
14) What is the total number of existing daily users that will benefit as a result of the proposed project?
For roads and bridges, multiply current Average Daily Traffic (ADT) by 1.20. For inclusion of public transit, submidocumentation substantiating the count. Where the facility currently has any restrictions or is partially closed, us documented traffic counts prior to the restriction. For storm sewers, sanitary sewers, water lines, and other relate facilities, multiply the number of households in the service area by 4. User information must be documented an certified by a professional engineer or the jurisdictions' C.E.O.
Traffic: ADT 4000 X 1.20 = 4.800 Users
Water/Sewer: Homes X 4.00 = Users
15) Has the jurisdiction enacted the optional \$5 license plate fee, an infrastructure levy, a user fee, o dedicated tax for the pertinent infrastructure?
The applying jurisdiction shall list what type of fees, levies or taxes they have dedicated toward the type of infrastructure being applied for. (Check all that apply)
Optional \$5.00 License Tax <u>yes</u>
Infrastructure Levy Specify type
Facility Users Fee Specify type
Dedicated Tax Specify type
Other Fee, Levy or Taxyes Specify type Tax Levy - Specific Dollar amount earmarked for Street Improvements

General Statement for Rating Criteria

Points awarded for all items will be based on engineering experience, field verification, application information and other information supplied by the applying agency, which is deemed to be relevant by the Support Staff. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

Appeal Score

CIRCLE THE APPROPRIATE RATING

What is the physical condition of the existing infrastructure that is to be replaced or repaired? 1)

25 - Failed	TENSIVE)	FULL	DOTH.
-------------	-----------	------	-------

23 - Critical

202 Very Poor

17 - Poor

- 15 Moderately Poor
- 10 Moderately Fair
- 5 Fair Condition
- 0 Good or Better

Criterion 1 - Condition

Condition of the particular infrastructure to be repaired, reconstructed or replaced shall be a measure of the degree of reduction in condition from its original state. Historic pavement management data based on ASTM D6433-99 rating system may be submitted as documentation. Capacity, serviceability, safety and health shall not be considered in this criterion. Any documentation the Applicant wishes to be considered must be included in the application package.

Definitions:

Failed Condition - requires complete reconstruction where no part of the existing facility is salvageable. (E.g. Roads: complete reconstruction of roadway, curbs and base; Bridges: complete removal and replacement of bridge; Underground: removal and replacement of an underground drainage or water system.

Critical Condition - requires partial reconstruction to maintain integrity. (E.g. Roads: reconstruction of roadway/curbs can be saved; Bridges: removal and replacement of bridge with abutment modification; Underground: removal and replacement of part of an underground drainage or water system.

Very Poor Condition - requires extensive rehabilitation to maintain integrity. (E.g. Roads: extensive full depth, partial depth and curb repair of a roadway with a structural overlay; Bridges: superstructure replacement; Underground: repair of joints and/or replacement of pipe sections.

Poor Condition - requires standard rehabilitation to maintain integrity. (E.g. Roads: moderate full depth, partial depth and curb repair to a roadway with no structural overlay needed or structural overlay with minor repairs to a roadway needed; Bridges: extensive patching of substructure and replacement of deck; Underground: insituform or other in ground repairs.

Moderately Poor Condition - requires minor rehabilitation to maintain integrity. (E.g. Roads: minor full depth, partial depth or curb repairs to a roadway with either a thin overlay or no overlay needed; Bridges: major structural patching and/or major deck repair.

Moderately Fair Condition - requires extensive maintenance to maintain integrity. (E.g. Roads: thin or no overlay with extensive crack sealing, minor partial depth and/or slurry or rejuvenation; Bridges: minor structural patching, deck repair, erosion control.)

Fair Condition - requires routine maintenance to maintain integrity. (E.g. Roads: slurry seal, rejuvenation or routine crack sealing to the roadway; Bridges: minor structural patching.)

Good or Better Condition - little to no maintenance required to maintain integrity.

Note: If the infrastructure is in "good" or better condition, it will NOT be considered for SCIP/LTIP funding unless it is an expansion project that will improve serviceability.

move that is the project to the safety of the Public and the citizens of the District and/or servi	ce area?
25 - Highly significant importance 20 - Considerably significant importance 15 - Moderate importance 10 - Minimal importance 20 JUNICALINE COST - 20115 Poorly documented importance 0 - No measurable impact	Appeal Score
Criterion 2 – Safety The applying agency shall include in its application the type of deficiency that currently exists and had improve the situation. For example, have there been vehicular accidents attributable to the problem injuries or fatalities? In the case of water systems, are existing hydrants non-functional? In the case capacity inadequate to provide volumes or pressure for adequate fire protection? In all cases, specific Mentioned problems, which are poorly documented, generally will not receive more than 5 points. Note: Each project is looked at on an individual basis to determine if any aspects of this category applementation.	as cited? Have they involved of water lines, is the present commentation is required.
NOT intended to be exclusive.	
How important is the project to the <u>health</u> of the Public and the citizens of the District and/or servi	ce area?
25 - Highly significant importance 20 - Considerably significant importance 15 - Moderate importance 10 - Minimal importance 5 - Poorly documented importance 0- No measurable impact	Appeal Score
Criterion 3 – Health The applying agency shall include in its application the type, frequency, and severity of the health proble reduced by the intended project. For example, can the problem be eliminated only by the project, or v satisfactory? If basement flooding has occurred, was it storm water or sanitary flow? What complaint case of underground improvements, how will they improve health if they are storm sewers? How wo improve health or reduce health risk? In all cases, quantified documentation is required. Mentione documented, generally will not receive more than 5 points.	would routine maintenance be is if any are recorded? In the uld improved sanitary sewers
Note: Each project is looked at on an individual basis to determine if any aspects of this category apply are NOT intended to be exclusive.	v. Examples given above
Does the project help meet the infrastructure repair and replacement needs of the applying agency Note: Applying agency's priority listing (part of the Additional Support Information) must be filed with applications.	
25 - First priority project 20 Second priority project 15 -Third priority project 10 - Fourth priority project 5 - Fifth priority project or lower	Appeal Score
Criterion 4 – Jurisdiction's Priority Listing The applying agency must submit a listing in priority order of the projects for which it is applying. Point basis of most to least importance. The form is included in the Additional Support Information.	ts will be awarded on the

3)

To what extent will a user fee funded agency be pa	rticipating in the funding of the project?
10 – Less than 10%	
9 – 10% to 19.99%	
8 – 20% to 29.99%	Appeal Score
7 – 30% to 39.99%	••
6 – 40% to 49.99%	
5 – 50% to 59.99%	
4 – 60% to 69.99%	
3 – 70% to 79.99%	
2 – 80% to 89.99%	
1 – 90% to 95%	
0 – Above 95%	

Criterion 5 - User Fee-funded Agency Participation

To what extent will a user fee funded agency be participating in the funding of the project? (Example: rates for water or sewer, frontage assessments, etc.). The applying agency must submit documentation.

6) Economic Growth - How the completed project will enhance economic growth (See definitions).

10 – The project will <u>directly</u> secure new employment	Appeal Score
5 – The project will permit more development	• •
(1) The project will not impact development	

Criterion 6 - Economic Growth

Will the completed project enhance economic growth and/or development in the service mea?

Definitions:

Secure new employment: The project as designed will secure development/employers, which will immediately add new permanent employees to the jurisdiction. The applying agency must submit details.

Permit more development: The project as designed will permit additional business development/employment. The applying agency must supply details.

The project will not impact development: The project will have no impact on business development.

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply.

7) Matching Funds - LOCAL

10 - This project is a loan or credit enhancement

10 - 50% or higher

8 – 40% to 49.99%

List total percentage of "Local" funds 3 %

6-30% to 39.99%

4 - 20% to 29.99%

2-10% to 19.99%

0 - Less than 10%

Criterion 7 - Matching Funds - Local

The percentage of matching funds which come directly from the budget of the applying agency. Ten points shall be awarded if a loan request is at least 50% of the total project cost. (If the applying agency is not a user fee funded agency, any funds to be provided by a user fee generating agency will be considered "Matching Funds – Other").

Matching Funds - OTHER	List total percentage of "Other" funds%		
10 – 50% or higher	List below each funding source and percentage		
8 – 40% to 49.99%			
6 – 30% to 39.99%	<u> </u>		
4 – 20% to 29.99%			
2 – 10% to 19.99%			
11% to 9.99%			
(0) Less than 1%			

Criterion 8 - Matching Funds - Other

The percentage of matching funds that come from funding sources other than those mentioned in Criterion 7. A letter from the outside funding agency stating their financial participation in the project and the amount of funding is required to receive points. For MRF, a copy of the current application form filed with the Hamilton County Engineer's Office meets the requirement.

9) Will the project alleviate serious capacity problems or hazards or respond to the future level of service needs of the district?

10 - Project design is for future demand.	Appeal Score
8 - Project design is for partial future demand.	11
6 - Project design is for current demand.	
4-Project design is for minimal increase in capacity.	· · · · · · · · · · · · · · · · · · ·
Project design is for no increase in capacity.	

Criterion 9 - Alleviate Capacity Problems

The applying agency shall provide a narrative, along with pertinent support documentation, which describe the existing deficiencies and showing how congestion will be reduced or eliminated and how service will be improved to meet the needs of any expected growth or development. A formal capacity analysis must accompany the application to receive more than 4 points. Projected traffic or demand should be calculated as follows:

Formula:

Existing volume x design year factor = projected volume

<u>Design Year</u>	<u>Design year factor</u>			
	<u>Urban</u>	Suburban	Rural	
20	1.40	1.70	1.60	
10	1.20	1.35	1.30	

Definitions:

<u>Future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for twenty-year projected demand or fully developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Partial future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for ten-year projected demand or partially developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Current demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service only for existing demand and conditions.

Minimal increase – Project will reduce but not eliminate existing congestion or deficiencies and will provide a minimal but less than sufficient increase in existing capacity or service for existing demand and conditions.

No increase – Project will have no effect on existing congestion or deficiencies and provide no increase in capacity or service for existing demand and conditions.

Readiness to Proceed - If SCIP/LTIP funds are granted, when would the construction contract be awarded?

Will be under contract by December 31, 2009 and no delinquent projects in Rounds 20 & 21

3 - Will be under contract by March 31, 2010 and/or one delinquent project in Rounds 20 & 21

0 - Will not be under contract by March 31, 2010 and/or more than one delinquent project in Rounds 20 & 21

Criterion 10 - Readiness to Proceed

The Support Staff will assign points based on engineering experience and status of design plans. A project is considered delinquent when it has not received a notice to proceed within the time stated on the original application and no time extension has been granted by the OPWC. An applying agency receiving approval for a project and subsequently canceling the same after the bid date on the application will receive zero (0) points under this round and the following round.

Appeal Score

11) Does the infrastructure have regional impact? Consider origination and destination of traffic, functional classifications, size of service area, and number of jurisdictions served, etc.

10 - Major Impact

8 - Significant Impact

6_ Moderate Impact

4 Minor Impact

2 – Minimal or No Impact

Criterion 11 - Regional Impact

The regional significance of the infrastructure that is being repaired or replaced.

Definitions:

Major Impact - Roads: Major Arterial: A direct connector to an Interstate Highway; Arterials are intended to provide a greater degree of mobility rather than land access. Arterials generally convey large traffic volumes for distances greater than one mile. A major arterial is a highway that is of regional importance and is intended to serve beyond the county. It may connect urban centers with one another and/or with outlying communities and employment or shopping centers. A major arterial is intended primarily to serve through traffic.

Significant Impact - Roads: Minor Arterial: A roadway, also serving through traffic, that is similar in function to a major arterial, but operates with lower traffic volumes, serves trips of shorter distances (but still greater than one mile), and may provide a higher degree of property access than do major arterials.

Moderate Impact - Roads: Major Collector: A roadway that provides for traffic movement between local roads/streets and arterials or community-wide activity centers and carries moderate traffic volumes over moderate distances (generally less than one mile). Major collectors may also provide direct access to abutting properties, such as regional shopping centers, large industrial parks, major subdivisions and community-wide recreational facilities, but typically not individual residences. Most major collectors are also county roads and are therefore through streets.

Minor Impact - Roads: Minor Collector: A roadway similar in functions to a major collector but which carries lower traffic volumes over shorter distances and has a higher degree of property access. Minor collectors may serve as main circulation streets within large, residential neighborhoods. Most minor collectors are also township roads and streets and may, or may not, be through streets.

Minimal or No Impact - Roads: Local: A roadway that is primarily intended to provide access to abutting properties. It tends to accommodate lower traffic volumes, serves short trips (generally within neighborhoods), and provides connections preferably only to collector streets rather than arterials.

12)	What is the overall economic health of the jurisdiction	n?
